ABOUT ME

Hi, I'm Taylor Radtke, a Full-stack Engineer and Designer passionate about creating elegant, scalable solutions to complex challenges. I excel in transforming ideas into sleek, maintainable software with accessibility at the forefront. Known for thriving under pressure, managing multiple priorities, and delivering high-quality results, I write code with future maintainers in mind and emphasize user-centric architecture. My goal is to secure a full-time role where I can contribute to a dynamic, innovative team and make a meaningful impact through collaborative problem-solving and technical expertise

EXPERIENCE

MAY 2020 – PRESENT

Northwestern Mutual

Software Engineer

Milwaukee, WI

Specialized in designing and implementing scalable, secure solutions to support financial services. Expertise in modern technologies, agile practices, and collaborative problem-solving to deliver innovative systems aligned with business objectives.

APRIL 2019 – MAY 2020

Booz Allen Hamilton

Senior Engineer

McLean, VA

Developing secure, scalable solutions for government agencies. Skilled in modern software practices, compliance with federal standards, and agile methodologies. Adept at collaborating with cross-functional teams to deliver mission-critical systems that align with client goals and objectives.

JULY 2018 – APRIL 2019

Cisco

Engineer

Herndon, VA

Developed a fully dynamic WordPress theme utilized by hundreds of partners, enabling personalized branding through custom typography, colors, and logos. Delivered a scalable solution enhancing user experience and brand consistency.

OCT 2016 – JULY 2018

AAPA

Full-Stack Web Developer

Alexandria, VA

Redesigned a website in under 4 months, transitioning to a new CMS for improved functionality. Created detailed mock-ups to ensure quality and client satisfaction before development. Served as Lead Designer and Developer for the Annual Conference website, delivering a polished and user-focused solution.

APR 2016 – OCT 2016

The Motley Fool

Front-End Web Developer

Alexandria, VA

Designed and developed engaging microsites, newsletters, and email templates to enhance user engagement. Conducted comprehensive BrowserStack usability testing to ensure functionality and responsiveness across all devices and browsers.
